Editor's Note
Welcome to our second INCLUSION² newsletter, and thank you for being a part of the program. We have had a very exciting few weeks, which have granted us the opportunity to engage with incredible leaders in STEM and entrepreneurship. We held our first Entrepreneurship 101 course on Friday 23 Feb. The course was attended by 22 women from all fields and ages, demonstrating the opportunity to engage more people in entrepreneurship. These women were joined by 11 entrepreneurs and industry professionals who shared their experience and insights.

We began March by celebrating International Women's Day, although to be honest it felt like International Women's Week! We hosted a table at the IWD Breakfast in support of the UN Women’s program, attended the Jobs for NSW IWD event with a great talk by Annie Parker, and spoke to high school students about how they can navigate a brilliant career in STEM. It was easy to think that gender diversity was all in hand at these events but we still have work to do. Indeed, it is through collaborative initiatives like these, that we can continue to break down barriers to diversity and ensure innovative solutions are delivered by leaders just as diverse as the society they serve.

Thank you again for your support and please reach out if you want to engage further.

- Alex Harrington
Entrepreneurship 101 Recap
On February 23, The Warren Centre hosted its first Entrepreneurship 101 Masterclass, a one-day intensive workshop for prospective entrepreneurs. The room was buzzing with excitement and networking from beginning to end. The course was attended by 22 aspiring entrepreneurs from diverse sectors and backgrounds including meditech to education. Service practitioners took participants through the process of establishing a business including accounting, legal considerations, marketing and PR, and thriving online. Before ending the day, participants were able to speak with successful entrepreneurs to get practical insights and connections.
Entrepreneurship 101 - 20 April 2018
As part of the second phase of the program, this one day masterclass is designed to provide women with the essential information they need to begin their journey in entrepreneurship. Click here to learn more and register for the next course. Can't make it to this one? Register your interest for upcoming courses on our website.

Engineering & IT Women's Networking Event
As we kicked off the month with International Women’s Day, The University of Sydney’s Faculty of Engineering & IT held a networking event for high school girls interested in these fields. The Warren Centre’s COO, Alex Harrington shared her own journey in STEM and entrepreneurship with the crowd in a motivating speech to encourage girls to follow their passions.
NSW Woman of the Year - Hala Zreiqat
Professor Hala Zreiqat, Head of Biomaterials & Tissue Engineering Research at the University of Sydney was awarded 2018 NSW Premier’s Award for Woman of the Year. Hala is a trailblazer in her field, a champion for women in STEM, and a valued friend of The Warren Centre.

Future STEM leaders share their stories
The first component of this program involves a series of video stories from university students sharing their journey in STEM studies. In this video, STEM students discuss their inspiration and offer advice to young girls considering studies in science, technology, engineering, and maths.
Female students discuss the value of diversity
STEM students talk about the value of diverse ideas in the STEM workforce.
